Universalism: Global Evidence

Overview

Identification	WP_universalism_pub_2
-----------------------	-----------------------

Abstract

This paper leverages nationally representative surveys across 60 countries and 64,000 respondents to present novel stylized facts about the relationship-specific nature of altruism. Across individuals, universalist preferences systematically vary with demographics such as age and religiosity, and are predictive of many left-wing political views, albeit in culturally highly heterogeneous ways. Across countries, universalism is strongly linked to a broader radius of trust. Looking at origins, universalism varies with the economic, political and religious organization of societies in ways that are consistent with the idea that the scope of altruism is partly shaped by economic incentives and democracy.

WP_universalism_pub.dta: This is the raw data file, which contains the base variables from the Gallup World Poll and Global Universalism Survey module that can be made available to the public. The file contains identifiers which allow for a merge with the confidential data. This is described in the readme file in the replication package.

WP_individual_release.dta: Individual level dataset – This file is a processed version of the survey responses and contains the computed universalism measures, political attitudes from the universalism module, demographic covariates from the world poll. Both unadjusted and recoded universalism measures are provided. This file is provided for convenience, and can be reproduced from the raw data using the code provided in the replication package.

Cty_means_release.dta: Country level dataset – This file contains processed data at the country level with universalism measures. This file is provided for convenience, and can be reproduced from raw data using the code provided in the replication package.

Language_mapping.dta: Mapping file to link languages in the Gallup World Poll to the Ethnologue/Ancestral Characteristics Database. Since individual level language data is only available with a license from Gallup, this file can be used to map the language recorded during the Gallup survey with the corresponding language tag in the Ethnologue or Ancestral Characteristics Database.

Region_mapping.dta: Mapping file to link subnational regions in the Gallup World Poll to the GADM subnational regions. Since individual level sub-national region data requires a license from Gallup, this file can be used to map the individual’s sub-national region to the GADM sub-national region.

Unit of Analysis	Individuals.
-------------------------	--------------

Scope & Coverage

Keywords	Microeconomics, Public Economics, Political Economy, Development Economics, Behavioural Economics, Cultural Economics
-----------------	---

Countries	60 countries worldwide
------------------	------------------------

Geographic Coverage

60 countries worldwide, median of 1000 respondents per country.

Universe

Individuals over the age of 15.

Producers & Sponsors

Sampling

<p>Sampling Procedure Telephone interviews conducted by Gallup.</p>
--

<p>Weighting Gallup provides probabilistic weights to make the survey data ex-post nationally representative. The weights are in the variable "wgt". We use these weights to calculate the country-level averages of the universalism statistic and use this weighted mean in our country-level analyses.</p>
--

Data Collection

Data Collection Mode	Telephone and Face-to-Face surveys.

WP21583: Distribution of Money Between Stranger From (Country) and Stranger From Anywhere

Information	[Type= discrete] [Format=numeric] [Range= 0-999999999] [Missing=*]
Statistics [NW/ W]	[Valid=32897 /-] [Invalid=33336 /-]
Definition	Distribution of money between stranger from (country) and stranger from anywhere
Literal question	Suppose now that the two people are someone from (response in SA/WP5) and someone from anywhere else in the world. Again, assume that these two people have THE SAME STANDARD OF LIVING. How much of your [insert country-specific currency value] (Country Currency) would you give to a random stranger from (response in SA/WP5), if the remaining money would go to a random stranger from anywhere else in the world?

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

subregion: Subregion - Gallup coding

Information	[Type= discrete] [Format=numeric] [Range= 1-1286] [Missing=*]
Statistics [NW/ W]	[Valid=1300 /-] [Invalid=0 /-]
Definition	Subregion - Gallup coding

Frequency table not shown (1286 Modalities)

gadm_subregion_code: GADM Subregion Code

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=1300 /-] [Invalid=0 /-]
Definition	GADM Subregion Code

gadm_subregion_name: GADM Subregion Name

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=1300 /-] [Invalid=0 /-]
Definition	GADM Subregion Name
